Essa disciplina pretende tratar dos campos que hoje chamamos de História Digital e Arqueologia Digital. Partindo dos debates das humanidades digitais, analisaremos as questões referentes às aplicações computacionais aos ofícios do historiador e do arqueólogo suas implicações para a pesquisa e a escrita acadêmicas. Daremos especial ênfase ao seu impacto para os estudos de Antiguidade e Medievo. Discutiremos, pois, os temas centrais do campo, as possibilidades de pesquisa e os métodos que se apresentam hoje, tais como: bancos de dados, edições digitais, big data, mineração de texto, análise de redes, tecnologias 3D, sistema de informação geográfica (GIS).
